Our company, TechCorp, was founded in 2015 with a mission to revolutionize artificial intelligence. We specialize in developing cutting-edge machine learning solutions for enterprise clients. Our headquarters is located in San Francisco, California, with additional offices in New York and Austin.

We offer three main services: AI consulting, custom model development, and AI training workshops. Our team consists of 150+ engineers, data scientists, and AI researchers. We work with Fortune 500 companies across various industries including healthcare, finance, and retail.

Our flagship product is the TechCorp AI Platform, which allows businesses to deploy machine learning models at scale. The platform supports both cloud and on-premise deployments and includes features like automated model monitoring, A/B testing, and real-time inference capabilities.
